HAIR TREATMENT

# Blonde Set

## Usage Instructions

---

### Introduction to the Blonde Set

Our Blonde Set is designed to achieve perfect, straight blonde hair while maintaining health, color, and shine. This set is suitable for all shades of blonde, from platinum to golden honey, as well as natural gray hair. In this guide, you'll learn how to use the set to achieve the best results.

---

#### What's Included:

- 25.36 oz / 750 ml OXO Anti-Yellow Smoothing Treatment
- 13.5 fl.oz Silver Shampoo
- 5 fl.oz / 150 ml Silver Spray
- 5 fl.oz / 150 ml Purifying Shampoo

# Instructions:

## Assess Your Hair Condition

Before applying the OXO solution, assess the client's hair condition and current shade. This step will help you determine the amount of product needed and the duration for which it should be left on the hair.

# Step 1:

## Applying the Anti-Yellow OXO Organic Hair Smoothing Treatment

A

Hold a thin section of hair at a 90° angle and apply the treatment using a color brush. Drag the product through the hair using a tail comb, ensuring it is distributed evenly to the ends.

B

Avoid allowing the product to touch the scalp to prevent any potential irritation or imbalance. While there is no danger to the client or the hair, it may cause discomfort.

C

You can freely apply the substance to the edges of the hair.

## Application Steps:

01

The substance should be applied to 100% dry hair.

02

Do not wash the hair before applying the substance unless the hair has cream or mousse on it.

03

Examine each section of the hair separately. A client may have very strong roots with noticeable curls but dry or damaged ends that remain straight.

- Apply the substance to the roots first and leave the client without heat for the first 30 minutes.
- Then, apply the solution to the damaged parts and let it sit for another 30 minutes without heat.
- If the ends also show curls, apply the solution to the entire length of the hair and leave it for 1 hour.

## Step 2:

Rinse the hair 2-3 times using a purifying shampoo and towel-dry the hair.

## Step 3:

Apply the silver spray evenly to damp hair using a brush until the hair changes its color to light purple.

## Step 4:

Completely dry the hair using a blow dryer.

## Step 5: Straightening Blonde/Gray Hair

01

Use a ceramic flat iron and adjust the temperature to between 410°F and 450°F.

02

Adjust the temperature based on the hair's response to avoid discoloration. High temperatures can cause yellowing.

03

Carefully straighten the hair, monitoring for any changes in color.

04

If you notice the hair starting to turn yellow, stop immediately and reconsider the temperature setting.

## Step 6: Applying the Mask

01

Apply the mask to the hair and leave it in for 5 minutes.

02

Rinse thoroughly.

03

Dry the hair to see the results.

### \* If there is still movement:

Use the straightener again. Hold it on the spot for a few seconds without making long movements.

You can color or highlight the hair immediately after the treatment.

## **Additional Tips for Daily Use:**

To maintain the client's perfect blonde hair, use the silver shampoo and OXO hair mask once or twice a week, substituting them in place of your regular products as needed. The Blonde Spray can be used once a week or bi-weekly, depending on your hair's color.

## **For the next two weeks:**

It is recommended to use silver spray or the silver shampoo. The previous hair color will gradually return to its original state.
